Resume Summary

Throughout my career in computer engineering, I have focused not only on developing applications but also on designing end-to-end technological systems. My professional journey began with system and network administration and has since expanded to include web applications, mobile applications, backend services, cloud infrastructure, DevOps processes, and AI-based solutions. Thanks to this multidisciplinary experience, I have developed an engineering perspective that allows me to evaluate not only the code side of a product but also its architecture, operational requirements, and long-term sustainability.

In recent years, while developing scalable applications in the JavaScript, Dart, React Native, Flutter, Node.js, TypeScript, Java, and Python ecosystems, I managed modern software development lifecycles using Docker, Kubernetes, Amazon Web Services, Google Cloud Platform, and CI/CD technologies. I have taken an active role in mobile applications, smart home technologies, alarm systems, remote monitoring platforms, image processing solutions, and automation projects running in production environments, assuming responsibilities in both product development and technical leadership. My primary goals include simplifying complex problems, reducing technical debt, and creating sustainable software architectures. My primary goal has always been to earn and uphold the trust of the people I work with.

Today, I am focusing my efforts on generative AI, LLM-based applications, RAG architectures, and agentic systems. By combining traditional software engineering principles with AI technologies, I aim to develop solutions that accelerate organizations' access to information, support decision-making processes, and enhance operational efficiency. In this process, I strive to adapt to new technologies as much as possible and move beyond the traditional software developer category to integrate AI solutions into my projects. Currently, I am actively following and incorporating technologies such as Anthropic Claude Code, OpenAI Codex, and Google Antigravity, as well as models like Google Gemma, Alibaba Qwen, IBM Granite, and Deepseek R1 into my projects. As an engineer who not only uses technology but also continuously learns, researches, and innovates, I aim to continue creating value in fields that shape the future of software.

You can access my detailed portfolio and the projects I'm working on via my website, LinkedIn profile, and GitHub page below:

Experience

Senior Software Engineer

Netelsan Elk. Elek. Sist. San. Tic. Ltd. Şti. | December 2025 - Still Working

Ankara , Permanent / Full-time

Informatics Sector, Research and Development (R&D) Department

- Developing web/mobile and backend applications for smart home technologies.(Apps can currently be found by searching for "Netelsan Alarm System" and "Netelsan Cloud" in Google & Apple app stores)

- Developing remote monitoring softwares for smart home technologies.

- Managing remote Windows and Linux servers. Setting up, monitoring, and maintaining Amazon Web Services and Google Cloud Platform.

- "Automatic Versioning and Distribution System" for R&D and production line. Automatic version bypass system that configures the CI/CD processes of R&D

software to prevent manual software installation errors on the production line and optimize the software access time of the production line.

- Performing database control/watch operations for web and mobile applications.

Software Engineer

Freelancer | January 2023 - November 2025

Ankara , Freelance

Informatics Sector, Research and Development (R&D) Department

Since 2022, I have been working as a freelance web & mobile app developer, creating user-friendly and functional web & mobile apps for various platforms. In my projects, I have delivered high-quality software by applying modern design principles and the latest technologies to enhance the user experience. Additionally, I have worked to increase customer satisfaction by analyzing user feedback and continuously improving my apps. I have developed, delivered, and maintained numerous projects. Some of these include:

- ERP integration module software
- Mobile device tracking and monitoring software
- Software for creating private clouds for organizations
- A wide range of web and mobile applications tailored to specific needs across various industries

Software Engineer

Netelsan Elk. Elek. Sist. San. Tic. Ltd. Şti. | March 2021 - January 2023

Ankara , Permanent / Full-time

Informatics Sector, Research and Development (R&D) Department

- Developing web/mobile and backend applications for smart home technologies.(Apps can currently be found by searching for "Netelsan Alarm System" and "Netelsan Cloud" in Google and Apple app stores)
- Developing remote monitoring softwares for smart home technologies.
- Performing database control & watch operations for web and mobile applications.
- Managing internal and external Windows (Active Directory, DNS, DHCP and RDP) and Linux remote servers.
- Managing internal Sophos/WatchGuard firewalls, network systems and NEUTRON camera systems.
- Managing all aspects of company websites (domain, hosting, etc.)
- Integration with company backup Synology systems/servers.
- Integration with company Uyumsoft ERP.

Mobile Application Developer

Bitcraft | October 2019 - January 2021

Ankara , Seasonal / Project-based

Software Sector

- Various customer-specific applications (specifically those not available in stores) were developed for Android, iOS, and web platforms.

- A company-specific mobile (Flutter) platform for cloud files, email, and message sharing and authorization.
- A mobile (Flutter) and web (frontend: JavaScript/React - backend: Java/Spring) application for vehicle tracking systems.

Information Technology Specialist

Alfa E-Ticaret Danışmanlık A.Ş. | September 2018 - June 2019

Ankara , Permanent / Full-time

Consultancy Sector, Marketing Department

- Installation, maintenance, optimization, and security of Windows/Linux servers
- Creation of a tracking and logging mechanism for e-commerce website security, and firewall configuration
- Review, renewal, and improvement of the company's network infrastructure
- Completion of infrastructure preparations for the transition to the e-Invoice system and development of the necessary applications in the .NET environment
- Design and implementation of six separate e-commerce tracking applications and creation of online tracking mechanisms

- Tekin Korkmaz - Alfa E-Commerce Consulting Inc. Sales and Marketing Specialist, Mobile: 0532 381 46 08 Email: tekinkorkmaz06@gmail.com

E-Commerce Specialist

Pearl Sprout LLC | December 2016 - July 2018

Ankara , Permanent / Full-time

E-commerce Sector, IT Department

- Creation and management of the mermaidcase.com e-commerce website.
- Shopify integration, integration of auxiliary tools, front-end development, R&D operations, and social media advertising management.

System and Network Engineer

Deniz Kuvvetleri Komutanlığı | September 2013 - November 2016

Ankara , Permanent / Full-time

Engineering services Sector, Information Technology Department

- Monitoring, troubleshooting, and remediating Active Directory, Exchange, File Server, and Hyper-V systems on servers running Microsoft Windows Server 2008/2012/2016.
- Monitoring, troubleshooting, and remediating LDAP, DHCP, FTP, Postfix, File Manager, and Cloud systems on Linux-based servers running Debian, Ubuntu, and Pardus.
- Configuration management, architectural design, and field operations for Cisco (Switch, Router, etc.) devices.
- Developing various network security applications in the .NET environment,

enabling remote user management using scripts, and developing instant messaging applications.

- Creating secure file sharing platforms and projecting user restrictions.
- Configuring and monitoring Linux-based firewall configurations for Web/Desktop applications.

Intern Engineer

Ceviz Bilgi Teknolojileri | July 2011 - August 2011

İstanbul(Asya) , Intern

Informatics Sector, Business Development Department

Microsoft SharePoint Web Application Development;

- Project 1: Development of web applications for Microsoft SharePoint pages for various companies and government agencies, including user/group-based authorization and file system integration.
- Project 2: Development of a platform similar to kickstarter.com

Intern Engineer

Vodasoft Çağrı Merkezi Çözümleri | June 2011 - July 2011

İstanbul(Asya) , Intern

Call center services Sector, Information Technology Department

C#/ASP.NET Web Application Development;

- Project: Development of a record-keeping/inquiry/correction system for call center employees, designed to avoid repetitive development for multiple companies.

Intern Engineer

CNREXPO Fuarçılık | June 2010 - July 2010

İstanbul(Avr.) , Intern

Fair / exposition Sector, Information Technology Department

C# Application Development;

- Project: Categorizing trade show attendees and creating a visitor database for future trade shows, along with an information system to ensure participation in relevant trade shows.

Education

Anadolu University

Business Administration, Turkish | August 2022 - January 2025

Graduation Degree: 3.75/4

Bachelor

Karadeniz Technical University (KTU)

Engineering Faculty, Computer Engineering, English, Formal Education | October 2008 - June 2013

Graduation Degree: 2.79/4

Bachelor

Projects: sharePlace Mobile Android Application, Character Recognition with Artificial Neural Systems, Jigsaw Puzzle Solver, Object Recognition with Image Processing, Library Database System

Istanbul University (IU)

Management Information Systems | October 2024 - Ongoing

Bachelor

Rize Fener (YDA) Süper Lisesi

Physical Sciences, Super High School | June 2008

High School

Languages

Turkish (Native Language), **English** (Advanced), **French** (Basic)

Skills

Kotlin, Swift, Postgresql, JIRA, MS SQL Server, Mysql, Dhcp, Ldap, Linux, C#, HTML, Java, JavaScript, Python, CSS, E-Commerce, SQL, Mobile Application, Ubuntu, Git, File Server, Github, Pardus, Ubuntu Linux, Hyper-V, Debian Linux, All Windows Operating System, Java Spring, Linux Sistem Yönetimi, Google Cloud, CCNA -Cisco Network Kursu Katılım, Linux Administration, React Native, MongoDB, Typescript, Node.Js, Amazon Ec2, Jaspersoft, Active Directory & Domain System, Windows Server 2008 / 2012 R2 / 2016, Docker, Kubernetes, React, Flutter

Certificate / Seminars and Courses

Python 101 for Data Science

IBM | April 2026

Credential ID: 5ac6eabe1e3e448f97490ae85e3c12f7

Talents: NumPy, Data Analyze, Python, Jupyter Notebook, Pandas

Credential Link:

Introduction to Generative AI

Google | April 2026

Credential ID: 23798362

Talents: Deep Learning, Machine Learning, Cloud Computing, AI, LLMs

Credential Link: https://www.skills.google/public_profiles/f12d1071-06da-4184-ae4c-ec9a43295466/badges/23798362

Gen AI: Beyond the Chatbot

Google | April 2026

Credential ID: 23799197

Talents: Machine Learning, AI, LLMs

Credential Link: https://www.skills.google/public_profiles/f12d1071-06da-4184-ae4c-ec9a43295466/badges/23799197

Claude Code 101

Anthropic | April 2026

Credential ID: xiast5enj4xw

Talents: Claude Code, MCP

Credential Link: <https://verify.skilljar.com/c/xiast5enj4xw>

AI Fluency Framework

Anthropic | April 2026

Credential ID: szkh29v76syv

Talents: Prompt Engineering, AI

Credential Link: <https://verify.skilljar.com/c/szkh29v76syv>

Introduction to Agent Skills

Anthropic | April 2026

Credential ID: yezrj5jd63pg

Talents: Prompt Engineering, AI

Credential Link: <https://verify.skilljar.com/c/yezrj5jd63pg>

Introduction to Model Context Protocol

Anthropic | April 2026

Credential ID: 7nhwwpoo5xew

Talents: Anthropic Claude, MCP, AI

Credential Link: <https://verify.skilljar.com/c/7nhwwpoo5xew>

Building with the Claude API

Anthropic | April 2026

Credential ID: tpmqa4yquc64

Talents: Claude Code, MCP, RAG, Anthropic Claude API, AI Agents & Workflows, Prompt Caching, Function Calling / Tool Use

Credential Link: <https://verify.skilljar.com/c/tpmq4yquc64>

Gen AI Agents: Transform Your Organization

Google | April 2026

Credential ID: 23802425

Talents: RAG, Google Gemini

Credential Link: https://www.skills.google/public_profiles/f12d1071-06da-4184-ae4c-ec9a43295466/badges/23802425

Gen AI Apps: Transform Your Work

Google | April 2026

Credential ID: 23802106

Talents: NotebookLM, GCP, Google Gemini, Prompt Engineering, Prompt Chaining

Credential Link: https://www.skills.google/public_profiles/f12d1071-06da-4184-ae4c-ec9a43295466/badges/23802106

AWS Cloud Quest: Cloud Practitioner - Training Badge

Amazon Web Services (AWS) | April 2026

Credential ID: d6a23e7f-e791-45dc-af4c-2c153100f8ab

Talents: EC2, S3, VPC, RDS, AWS, IAM

Credential Link: https://www.credly.com/badges/d6a23e7f-e791-45dc-af4c-2c153100f8ab/linked_in_profile

Career Essentials in Generative AI by Microsoft and LinkedIn

Microsoft | April 2026

Credential ID:

c9bf2e317293a00fa8dfb3a745801ad1d736f4dee5a058e2ae28c3f668928f31

Talents: Generative AI, Microsoft Copilot, Responsible AI, Artificial Intelligence for Businesses

Credential Link:

<https://www.linkedin.com/learning/certificates/c9bf2e317293a00fa8dfb3a745801ad1d736f4dee5a058e2ae28c3f668928f31>

Microsoft Active Directory Troubleshooting

Microsoft | April 2016 - April 2016

Basic information and troubleshooting training on Microsoft Active Directory

Pardus Kamu Açık Kaynak Konferans Eğitimleri

TÜBİTAK ULAKBİM | November 2015 - November 2015

Various trainings on Network Management with Linux, Virtualization, Log Management, Leader/Harmony Systems, LibreOffice Applications

Linux Sistem Yönetimi (2. Düzey)

Linux Yaz Kampı | August 2014 - August 2014

Information and applications on Scripting, DNS/DHCP, Email Server, FTP and Web Service, Proxy Server, File Server/Storage, Network Management Applications, Directory Services, Virtualization, Firewall Management, Creating a Central Log Server, Information Security Fundamentals, etc.

Pardus Kamu Çalışanları Linux Eğitimi

TÜBİTAK ULAKBİM | September 2013 - October 2013

Information and applications on Linux Command Line Tools, Linux Package Management, Repository Configuration, Boot Process and Related Scripts, Virtualization, System Administration, Basic Pardus Network Services, Server Configuration, Pardus Technologies, LibreOffice Tools.

Temel Ağ ve Sistem Planlama Kursu

Kara Kuvvetleri Komutanlığı MEBS Okulu | January 2013 - February 2013

Architectural planning and configuration management of Cisco network devices (Switch/Router etc.)

Exam Details

YDS - Yabancı Dil Sınavı

October 2023

Test Result: 72,5

Projects

Creating and Monitoring Log Management/Tracking Systems with "Cacti, WhatsApp Gold and Zabbix"

December 2016

A Log Management/Monitoring system was created for servers built for various purposes, in response to user requests. This process was also implemented for network devices using "WhatsUp Gold."

Windows Application for Rapid Configuration Changes of Cisco Network Devices

March 2016

This project has created solutions to some of the restriction mechanisms that needed to be expedited by using an authorized computer and application. These transactions, which used to take 15 minutes for each user joining or leaving the network, can now be completed within one minute.

"Clonezilla" Image Distribution System Project and Implementation

January 2016

As part of the project, the Clonezilla application was implemented to distribute images to devices connected to the network in a LAN environment. This allows remote access to each device and updates to their operating systems.

Military Incident/Notification and Instant Warning System

June 2015

Development of the "Incident/News Receiving and Instant Alert System" for military personnel has been completed. The incident/news input system and the user notification system have been successfully implemented as two separate components of the application.

Active Directory Control and User Management with Web Applications

May 2015

This application was developed to provide quick solutions to users' requests and to prevent unauthorized users from accessing AD servers, making it possible to find solutions to various problems within seconds.

Creation and Implementation of "ownCloud" Secure File Sharing Platform

May 2015

With this project, the "ownCloud" secure file sharing platform was created and implemented in the server environment.

Migration from Windows to Pardus Operating System in Server and Client Environments

January 2015

In this project, the contract creation and implementation work for the conversion of Windows server (AD, FTP, File Server, Terminal Server, etc.) and client (Windows 7) operating systems to the Linux-based Pardus Enterprise 5 operating system was completed.

The project included the design and implementation of the "Zimbra" open-source email server platform, and the installation and monitoring of the "Kibana" data discovery/visualization/analysis system.

In a separate phase of the project, the installation and distribution of Windows/Linux-based Terminal Servers to users using "openThinClient" was completed.

Controlling Computers Connected to the Terminal Server via the Web Environment

August 2014

The application, which was developed with MVC and various modules in order to find quick solutions to the problems of users connected to the terminal server, was successfully put into service and it was verified through tests that it could respond to hundreds of users.
