## SUMMARY

Full-stack engineer with 10+ years shipping products across mobile, web, backend and the infrastructure they run on. I have built React and Flutter clients, the Java/Spring and Node.js services behind them, and operated the Linux, cloud and network estates underneath — which means I design APIs knowing what the client actually needs, and ship features knowing what production will do with them. Recent work spans a full ERP delivered end to end and WebRTC service infrastructure running in production.

## CORE SKILLS

**Languages** Node.js/TypeScript, JavaScript, Python, Go, Java, C#, SQL

**Frontend & Mobile** React, React Native, Flutter/Dart, JavaScript/TypeScript, HTML/CSS

**Backend** FastAPI, Spring Boot, Express, REST API design, PostgreSQL, MySQL, MongoDB, Redis

**Infrastructure** Docker, Kubernetes, AWS, GCP, CI/CD, Linux administration, network and firewall operations

**LLM / AI** Anthropic & OpenAI APIs, tool use / function calling, RAG, MCP, prompt and semantic caching, retrieval evaluation

## EXPERIENCE

**Senior Software Engineer** | Netelsan
*Dec 2025 – Present · Ankara, Türkiye · Full-time*

Backend and platform engineering for IP-intercom, burglar alarm and smart-home products.

- Build and operate the Android/iOS/WebRTC service infrastructure on AWS — a horizontally scalable, Docker-based architecture serving the deployed device fleet and load-tested well beyond current production volume.
- Instrumented the production Node.js services with structured logging (pino), Prometheus metrics and Grafana dashboards — incidents now surface through alerting instead of user reports, with request-level traces available for diagnosis.
- Designed and shipped an automated versioning and distribution system that wires R&D CI/CD output into the production line, eliminating manual software installation errors on the line.
- Own database operations and monitoring for the web and mobile backends.

**Stack:** Node.js/TypeScript, WebRTC, PostgreSQL, MongoDB, AWS, Docker, Prometheus, Grafana, pino

**Software Engineer (Contract)** | Al Samah Est. for General Contracting
*Feb 2022 – Aug 2023 · Remote · Saudi Arabia*

Sole engineer on a custom ERP platform for a Saudi general contracting company, delivered end to end and rolled out company-wide across site operations, HR and finance.

- Designed and built the backend in Java and Spring Boot over MySQL, covering human resources, project management, inventory, equipment, and purchasing and supplier management.
- Built the web application in React for site managers, HR and finance users.
- Developed a companion Flutter mobile app providing map-based field personnel tracking for site supervisors.
- Delivered the reporting layer as the final phase, closing out the project.
- Worked fully remotely with a distributed team across time zones.

**Stack:** Java, Spring Boot, MySQL, React, JavaScript, Flutter, Dart

**Software Engineer** | Netelsan
*Jan 2021 – Jan 2022 · Ankara, Türkiye · Full-time*

- Built backend and mobile applications for smart-home and remote-monitoring products.
- Operated the company Linux and Windows server estate — Active Directory, DNS, DHCP, RDP — across internal and external servers.
- Managed network and security infrastructure: Sophos/WatchGuard firewalls, switching, and camera systems.
- Delivered Uyumsoft ERP and Synology backup integrations.

**Stack:** Node.js, React Native, MongoDB, Linux, Windows Server, Sophos

## EARLIER EXPERIENCE

**Mobile Application Developer** | Bitcraft
*Oct 2019 – Jan 2021 · Ankara, Türkiye*

- Delivered Android, iOS and web applications for enterprise clients, including private-distribution apps outside public stores.
- Built a Flutter platform for cloud file, email and message sharing with role-based authorization.
- Built a fleet-tracking system end to end: Flutter mobile client, React web frontend, Java/Spring backend.

**Stack:** Flutter, Dart, React, JavaScript, Java, Spring

**IT Specialist** | Alfa E-Ticaret Danışmanlık
*2018 – 2019 · Ankara, Türkiye*

Hardened Windows/Linux servers, rebuilt the company network infrastructure, led the infrastructure migration to the national e-invoice system, and shipped a suite of .NET e-commerce tracking applications.

**System & Network Engineer** | Turkish Naval Forces
*2013 – 2016 · Ankara, Türkiye*

Operated Windows Server (Active Directory, Exchange, Hyper-V) and Linux estates (LDAP, DHCP, Postfix, file and cloud services), and designed Cisco switching/routing architecture and Linux firewall configurations. Built internal .NET tooling for network operations, including an authorization application that cut per-user network configuration changes from 15 minutes to under 1 minute.

## EDUCATION

**BSc Computer Engineering** | Karadeniz Technical University
*2008 – 2013 · English-medium programme*

**BSc Business Administration** | Anadolu University
*2022 – 2025 · GPA 3.75 / 4.00*

**BSc Management Information Systems** | Istanbul University
*2024 – Present*

## CERTIFICATIONS

Building with the Claude API — Anthropic, 2026
Introduction to Model Context Protocol — Anthropic, 2026
Insider One AI Weekend Certification — Insider One, 2026
AWS Cloud Quest: Cloud Practitioner — Amazon Web Services, 2026
